PROFESSIONAL SUMMARY

BSIT graduate with hands-on experience in web development, database management, and office productivity tools, built through a government internship and a team-based capstone project. Comfortable working across technical tasks (PHP, MySQL, systems troubleshooting) and administrative tasks (MS Office, data encoding, records handling), with direct experience communicating and coordinating within a live government office. Adaptable team player looking to contribute in web development, IT/technical support, data encoding, or administrative support roles.

TECHNICAL SKILLS

Core: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap

Tools: Git, GitHub, XAMPP, phpMyAdmin, VS Code

Also Applied: Chart.js (capstone data visualization), REST API fundamentals

Exposure (academic project): Angular, Ionic

TECHNICAL PROJECT EXPERIENCE

Full-Stack Developer | Dingalan Municipal Social Welfare and Development Management System

Academic Capstone Project | Team of 4

- Built as a full-stack contributor on a 4-person team, developing both frontend interfaces and backend logic in native PHP for the Municipal Social Welfare and Development Office.
- Designed and implemented a MySQL database schema supporting beneficiary management, application processing, records tracking, monitoring, and reporting modules.
- Integrated Chart.js to visualize report data, giving office staff a clearer, at-a-glance view of beneficiary and program trends.
- Centralized previously fragmented beneficiary records into one database, improving how information is retrieved and cross-referenced across modules.
- Participated in full-cycle testing and debugging across frontend and backend components ahead of project evaluation.

INTERNSHIP EXPERIENCE

Backend Developer Intern | Local Government Unit – Municipality of Gabaldon

January 2026 – April 2026 | Team of 4

- Served as backend developer on a 4-person team building a Municipal Budget Management System for internal government use.
- Built database-driven backend functionality in PHP and MySQL to support budget tracking and reporting workflows.
- Owned testing and debugging of backend features, identifying and resolving functional issues before handoff.
- Applied software development practices in a live government office environment, working within existing organizational requirements.

EDUCATION

Nueva Ecija University of Science and Technology – Gabaldon Campus

Bachelor of Science in Information Technology | Graduated 2026

North Poblacion, Gabaldon, Nueva Ecija
